2.3 As of the end of the reporting period, the company has no preferred shares.

3. SIGNIFICANT MATTERS

3.1 The main changes in the company's major accounting statements, financial indicators and reasons

The first quarter of 2019 witnessed a growth of 6.4% in China's GDP, representing a year-on-year decrease of 0.4 percentage point. The national economy maintained at a reasonable level, with a notable downturn trend in the challenging steel industry. From January to March, the steel production in China amounted to 269 million tonnes, representing a year-on-year increase of 10.8%. The steel price fluctuated in a small range with a slow upward trend, following a plummet in last November due to combined effects of various factors including the increase in steel production and the change in volume of steel used in certain steel-consuming industries. From January to March, the average value of the domestic steel price index was 108.14 points, representing a year-on-year decrease of 4.75%. The price of iron ore substantially increased as affected by the collapse of one of Vale's dam in Brazil, and the average of price indices of iron ore in China for January to March was 290.02 points, representing a year-on-year increase of 11.93%. As the profitability of steel companies was severely squeezed, the operating results of the Company's recorded a sharp year-on-year decrease.

During the reporting period, the Company and its subsidiaries (the "Group") produced an aggregate of 4.16 million tonnes of pig iron, 4.53 million tonnes of crude steel and 4.21 million tonnes of steel products, representing year-on-year decrease of 11.49%、10.47% and 11.92% respectively (of which the Company produced 3.23 million tonnes of pig iron, 3.52 million tonnes of crude steel and 3.22 million tonnes of steel products, representing year-on-year decrease of 12.70%、11.78% and 12.26% respectively). This was mainly due to the Company's permanent shut-down of two 420m³ blast furnaces in April 2018, the permanent shut-down of two 40-tonne converters in October 2018, and overhaul of a 2,500m³ blast furnace in January to February. According to the PRC Accounting Standards, the Group's operating revenue amounted to approximately RMB17,717 million, representing a year-on-year decrease of 3.23%, which was mainly due to the decrease in steel production of the Company during the reporting period. Net profit attributable to shareholders of the Company was RMB84 million, representing a year-on-year decrease of 94.09%, which was mainly due to the decrease in gross profit of the Company's steel products and the increasing price of raw materials such as iron ore, resulting in the fall in steel price during the reporting period as compared with the same period last year.

Items with more than 30% changes as compared to the end of last year in the consolidated financial statements and the reasons for such changes:

- (1) Cash and bank balances decreased by 30.08% as compared with the end of last year, mainly due to the company's use of cash to reduce the discounted bills in the current period, and its increase of appropriately using cash payment at the same time.
- (2) Notes receivable and accounts receivable increased by 67.58% as compared with the end of last year, which was mainly due to the decrease in endorsement and discount of notes receivable during the current

period and the increase in notes receivable held as compared with the end of last year.

- (3) Prepayments increased by 47.48% as compared to the end of last year, mainly due to increase in prepayments for purchasing raw materials and projects.
- (4) Financial assets purchased under agreement to resell decreased by 87.53% as compared to the end of last year, mainly due to a decrease in reverse repurchase business by the Finance Company.
- (5) Loans and advances to customers increased by 32.49% as compared to the end of last year, mainly due to an increase in the loan amount given by the Finance Company to its member units other than the Group.
- (6) The borrowing capital decreased by 44.47% compared with the end of last year, mainly due to the decrease of loans from other banks by the Finance Company during the reporting period.
- (7) Financial assets sold for repurchase decreased by 41.84% compared with the end of last year, mainly due to the decrease of capital of pledge equities to other financial institutions by the Finance Company during the reporting period.
- (8) Trading financial liabilities increased by 427.17% as compared with the end of last year, mainly due to the change in fair value of forward foreign exchange contracts held by the Company during the current period.
- (9) Payroll and employee benefits payable decreased by 36.57% as compared with the end of last year, mainly because the performance-based bonus which was provided at the end of last year was paid during the current period.
- (10) The taxes and charges payable decreased by 64.61% as compared to the end of last year, mainly because the Company and its subsidiary Anhui Changjiang Iron paid various taxes and fees which were due but unpaid as at the end of last year during the current period.
- (11) Non-current liabilities due within one year decreased by 52.93% as compared with the end of last year, mainly due to the repayment of long-term borrowings due within one year during the current period.

Items with more than 30% changes as compared to the same period of last year in the consolidated financial statements and the reasons for such changes:

- (1) R&D expenses increased by 78.20% compared with the same period of last year, mainly due to the Company's increased investment in scientific research, expansion of product development types, incurrence of related equipment depreciation expenses and increase in material costs as compared with the same period of last year.
- (2) Financial expenses decreased by 45.91% as compared with the same period of last year, mainly due to the increase in the Company's interest income as compared with the same period of last year and more interest provided by the Company for medium-term notes and short-term bonds held during the same period of last year.
- (3) Impairment loss decreased by 94.92% as compared to the same period of last year, mainly due to the decrease in inventory impairment provided by the subsidiaries for the current period as compared with the same period of last year.
- (4) Credit impairment losses amounted to RMB-1,186,971 as compared with RMB823,699 in the same period of last year, which was mainly due to the subsidiaries' recovery of part of the financial assets during the current period for which impairment losses had been provided, as compared with the provision of impairment losses in the same period of last year.
- (5) Other income decreased by 35.44% as compared to the same period last year, mainly due to the decrease of government grants related to operating activities received by subsidiaries during the reporting period as compared to the same period of last year.
- (6) Investment income decreased by 40.37% as compared to the same period of last year, mainly due to disposal of a subsidiary, Masteel (Shanghai) Industry & Trade Co., Ltd. during the same period of last

year.

- (7) Gain from disposal of assets was RMB437,536 as compared RMB47,548,990 in the same period of last year, which was mainly due to the gains recognised from the disposal of certain retired assets by Ma Steel (Hefei), a subsidiary of the Company during the same period of last year.
- (8) Non-operating income was RMB97,353,992 as compared with RMB167,746 in the same period of last year, mainly because Ma Steel (Hefei), a subsidiary of the Company, received government subsidies for capacity reduction.
- (9) Income taxes expense decreased by 49.53% as compared to the same period of last year, mainly due to decreased profitability of part of the subsidiaries during the reporting period as compared to the same period of last year.
- (10) Net profit attributable to owners of the parent company decreased by 94.09% as compared with the same period of last year, mainly due to the fall in steel price during the current period, the increase in price of some raw materials and consumables and the decrease in gross profit of steel products compared with the same period of last year.
- (11) Net profit/loss attributable to non-controlling interests decreased by 60.03% as compared to the same period of last year, mainly due to decreased profits of the non-wholly-owned subsidiaries during the reporting period as compared to the same period of last year.
- (12) Net cash outflow from operating activities was RMB2,289,422,589 as compared with a net inflow of RMB633,496,091 in the same period of last year, mainly due to the drop in steel prices during the current period as compared with the same period of the previous year, coupled with the increase in cash outflow because the payment method stipulated in most of the Company's procurement contracts for the period was by cash.
- (13) Net cash outflow from investment activities was RMB413,130,903 as compared with a net inflow of RMB 553,851,845 in the same period of last year, mainly due to the increase in cash paid for purchases of property, plant and equipment, intangible assets and other non-current assets as compared with the same period of last year, coupled with the decrease in cash received from investment income as compared with the same period of last year.
- (14) The net cash outflows from financing activities amounted to RMB198,994,952, compared with a cash outflows of RMB1,138,864,193 in the last year, which was mainly because the net difference between the Company's borrowings and its debts repayment was a net cash inflow, as compared with a net outflow in the same period of last year.

3.2 Analysis on progress, impacts and solutions of significant matters

By a letter sent to the Company dated 24 July 2015, Magang (Group) Holding Co., Ltd. ("Magang Group"), the controlling shareholder stated its plan to further acquire A Shares of the Company of not less than RMB409 million at an appropriate price through Magang Group Investment Company Limited, its wholly-owned subsidiary, in compliance with the applicable laws and regulations, and undertook that the shares acquired would not be sold within six months after the completion of the further acquisition plan. Details are set out in the "Announcement on Intended Increase in Shareholding of the Company's A Shares by the Controlling Shareholder" published by the Company on 25 July 2015. The link is as follows: <http://www.sse.com.cn> ; <http://www.hkexnews.hk> .

As a result of the influence coming from the industry, the production and operation of Magang Group were recovering. However, the operating costs of enterprises may increase due to supply-side reforms and environmentally-friendly production pressures, which may lead to financial strains. In addition, Magang Group aims at developing diversified businesses and vigorously developing the non-steel industries, which requires substantial amounts of capital. Up to now, it has not raised sufficient funds to finance the acquisition, and

therefore, the aforesaid acquisition plan has not been formally implemented yet. Magang Group will strive to raise fund in the premise to ensure manufacturing operation as well as steady fund operation, implement the further acquisition plan in compliance with the laws and regulations and strictly carry out its disclosure obligations.

3.3 No commitments not fulfilled within the reporting period

3.4 The warning and explanation for the forecast of the possible aggregate net profits from the beginning of the year to the end of the next reporting period becoming a loss or significant changes over the corresponding period last year.

In the first half of 2018, the Group's net profit attributable to shareholders of the parent company was approximately RMB3,429 million; in the first quarter of 2019, the Group's net profit attributable to shareholders of the parent company was approximately RMB84 million. At present, although steel price has rebounded slightly, the prices of main raw materials and consumables are still at a high level, thus the Group faces high pressure in production and operations. Therefore, the Company expects that the accumulated net profit for the period from the beginning of the year to the end of the next reporting period may be significantly decreased as compared with the same period of last year.

By order of the Board
Maanshan Iron & Steel Company Limited
Ding Yi
Chairman

25 April 2019

Maanshan City, Anhui Province, the PRC

As at the date of this announcement, the directors of the Company include:

Executive Directors: Ding Yi, Qian Haifan, Zhang Wenyang

Non-executive Directors: Ren Tianbao

Independent Non-executive Directors: Zhang Chunxia, Zhu Shaofang, Wang Xianzhu
